-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 10 September 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

### DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/10/2008 has been entered.
2. Independent Claims 12 and 25 are amended; Claims 13, 15 and 17-24 are cancelled [Claims 1-11 were previously cancelled]; and Claims 27-31 are new.
3. Claims 12, 14, 16 and 25-31 are pending.

### *Election/Restrictions*

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 12, 16 and 25-27, drawn to [*"A method of performing data transmission in an Ethernet communication network, including a subscriber and connection data..."*] preventing unauthorized access, classified in class 726, subclass 2.
  - II. Claims 28-31, drawn to [*"A method of performing a data transmission of a client terminal to lower-ranking communication network, including an access router and switching device..."*] protection of data in distributed communication systems, classified in class 713, subclass 153.
5. The inventions are distinct, each from the other because of the following reasons: Inventions listed as Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention has separate utility as follows:
  - Group I has separate utility [as disclosed, for example, in independent Claims 12 and 25] such as a method and a communication device for performing data transmission in an

Ethernet communication network, including a subscriber and discovery messages, wherein a session is authenticated using a combination of the connection and subscriber data that are contained in the discovery messages; on the other hand,

- **Group II** has separate utility [as disclosed, for example, in independent Claim 28] such as a method for performing a data transmission of a client connected to a lower-ranking communications network connected to a switching device, including discover message and an access router that is connected to the switching device, wherein the switching device identify, insert and transmit the discovery message and port; and the access router capable of terminating and/or the communication link between the client terminal and the higher ranking network.

See MPEP § 806.05(d).

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

8. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Should the applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if

the examiner finds one of the inventions unpatentable over prior art, the evidence or admission may be used in a rejection under 35 U.S.C 103(a) of the other invention.
